

Plumbing and Heating Engineer

Job - Domestic Plumbing / Heating Engineer

Salary - Negotiable depending on skill set and experience

Job Type - Full Time

At M&E Services, we do things differently!

Due to our expansion and development, we currently have vacancies for fully qualified Domestic Plumbing / Heating Engineers.

All engineers must have an excellent understanding of heating/ plumbing installations.

Having drive, motivation and a want for the company to do well is essential. There can be times when engineers are expected to work on until the jobs are complete.

We are team focused, so there are expectations from all members to help each other out from time to time.

General Duties

You will be carrying out domestic heating / plumbing installations / repairs in residential premises throughout Spalding and the surrounding area.

Candidates should be confident in their trade. Applicants must also be competent in the design and installation of new heating systems. M&E engineers are expected to carry out general plumbing maintenance duties and should be competent in all aspects of domestic plumbing. All applicants must be tidy, motivated and be able to provide excellent levels of customer service.

We expect that all of our engineer's workmanship is of the highest calibre, which should be clean, tidy and offer excellent customer service at all times.
